INTRODUCTION

WELCOME

As a leading distributor in Malaysia, Ultimate Fusion Sdn Bhd is committed to delivering high-quality products to our customers. With a primary focus on coconut-based products, Automated External Defibrillator (AED) and vending machines, we ensure that every product and service we offer meets the highest standards. We believe in building long-term relationships with our customers and business partners, founded on trust and consistent quality. With a dedicated and experienced team, we strive to provide the best solutions tailored to each customer's needs, while continuously innovating our operations to achieve excellence in every aspect of our business.

Coconut-Based Products Distributor

We pride ourselves on being a leading distributor of top-tier coconut-based products. From virgin coconut oil to health and beauty products, we ensure only the best for our customers. We believe in the exceptional health benefits and effectiveness of coconut, and we are committed to spreading this goodness nationwide.

Automated External Defibrillator (AED)

Our company is proud to offer Automated External Defibrillators (AEDs) to enhance public safety and emergency response. AEDs are lifesaving devices designed to treat sudden cardiac arrest (SCA), a condition where the heart unexpectedly stops beating. These portable devices are user-friendly, equipped with simple visual and auditory instructions, allowing even untrained bystanders to administer a potentially life-saving shock to the heart. By distributing these essential tools to public spaces such as airports, malls, and schools, we are committed to increasing the chances of survival for SCA victims and contributing to the overall health and safety of our communities.

Facilities Maintenance

As a premier distributor of state-of-the-art vending machines in Malaysia, our company is dedicated to revolutionizing the convenience and accessibility of quality products. Our vending machines offer a diverse range of options, from snacks and beverages to health and wellness items, ensuring that consumers have quick and easy access to what they need, whenever they need it. Designed with the latest technology, our machines are reliable, user-friendly, and equipped with secure payment systems to provide a seamless purchasing experience. By strategically placing our vending machines in high-traffic areas such as office buildings, shopping centers, and transportation hubs, we aim to enhance everyday convenience and meet the evolving demands of busy lifestyles.

Our Commitment.

“Adhere to principles of integrity, quality, and innovation. We are constantly seeking ways to improve our services and better meet the needs of our customers. With a dedicated and experienced team, we are confident in our ability to be your preferred partner “

Manufacturing Process

Our manufacturing process begins with the careful selection of high-quality coconuts, sourced from trusted suppliers who meet our strict criteria. Each coconut is chosen for its size, maturity, and nutritional content, ensuring that only the best raw materials enter our production line. Following selection, the coconuts undergo processing through stringent manufacturing procedures that adhere to international standards. This rigorous approach guarantees the purity, consistency, and safety of our products, meeting and exceeding global quality benchmarks.

Once the products are manufactured, they are integrated into our efficient supply and logistics chain, designed to ensure timely delivery to our clients worldwide. Throughout this process, our robust quality control and assurance systems monitor every stage, from raw material procurement to final packaging, ensuring that each product meets our high standards. This dedication to quality and efficiency has earned us widespread client satisfaction and recognition, solidifying our reputation as a trusted name in the industry.

Tuan/Puan,

PENGELASAN PRODUK

NAMA PRODUK: MINYAK KELAPA DARA (CECAIR)

Permohonan pengelasan bagi produk di atas adalah dirujuk.

2. Untuk makluman tuan, produk yang digunakan ke atas manusia atau haiwan untuk tujuan perubatan adalah di bawah kawalan Pihak Berkuasa Kawalan Dadah (PBKD). Merujuk kepada Peraturan-peraturan Kawalan Dadah dan Kosmetik 1984, "product" didefinisikan sebagai-

- a 'drug' in a dosage unit or otherwise, for use wholly or mainly by being administered to one or more human beings or animals for a medicinal purpose.

- a 'drug' to be used as an ingredients of a preparation for a medicinal purpose

'Drug' pula didefinisikan di bawah Akta Jualan Dadah 1952 sebagai 'any substance, product or article intended to be used or capable, or purported or claimed to be capable of being used on humans or any animal, whether internally or externally for a medicinal purposes'

3. Sehubungan dengan itu, produk tuan di atas bukan produk siap (*finished product*) tetapi sebagai bahan mentah untuk dibekalkan kepada industri pengilang untuk pemprosesan selanjutnya adalah tidak memenuhi definisi seperti di atas, maka dengan itu produk tersebut **TIDAK DIKAWAL** oleh PBKD.

4. Sila ambil maklum bahawa maklumat ini dinilai berdasarkan kepada data yang dikemukakan oleh pihak tuan semasa permohonan pengelasan dan HANYA untuk tujuan pengelasan sahaja. Sehubungan dari itu, pengelasan ini akan terbatal sekiranya didapati terdapat sebarang pengubahsuaian atau percanggahan maklumat semasa permohonan pengelasan dibuat atau perubahan polisi pengelasan produk.

5. Untuk makluman pihak tuan, bahagian pengelasan hanya membantu untuk mengelaskan sesuatu permohonan mengikut kategori yang terdapat dalam Bahagian Regulatori Farmasi Negara.

Unit Pengelasan,
Seksyen Koordinasi Regulatori Produk & Kosmetik,
Pusat Koordinasi & Perancangan Strategik Regulatori,
Bahagian Regulatori Farmasi Negara (NPRA),
Kementerian Kesihatan Malaysia.

2) Pengarah Kanan Bahagian Keselamatan dan Kualiti Makanan, KKM

AUTOMATED EXTERNAL DEFIBRILLATOR (AED)

- ✓ Portable electronic device that automatically diagnoses the life-threatening cardiac arrhythmias of ventricular fibrillation (VF) and pulseless ventricular tachycardia and is able to treat them through defibrillation, the application of electricity which stops the arrhythmia, allowing the heart to re-establish an effective rhythm.
- ✓ With simple audio and visual commands, AEDs are designed to be simple to use for the layperson, and the use of AEDs is taught in many first aid, certified first responder, and basic life support (BLS) level cardiopulmonary resuscitation (CPR) classes

Why are AEDs Important

AEDs make it possible for more people to respond to a medical emergency where defibrillation is required. Because AEDs are portable, they can be used by nonmedical people (lay-rescuers). They can be made part of emergency response programs that also include rapid use of 999/112 and prompt delivery of cardiopulmonary resuscitation (CPR). All three of these activities are vital to improving survival from SCA.

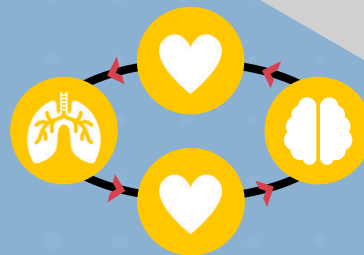

When someone has a cardiac arrest,

Every minute

Without defibrillation reduces their chances of survival by

7-10%

CPR increase the chances of survival because it keeps some blood circulating to vital organs such as the brain and the heart itself

70%

If a defibrillator is used and effective CPR is performed within **3-5 minutes** of cardiac arrest, survival chances can be as high as **50-70%**

50%

HEALTHCARE SERVICES

A built-in computer algorithm checks a victim's heart rhythm through adhesive electrodes. The computer calculates whether defibrillation is needed. If it is, a recorded voice prompts the rescuer to press the shock button on the AED. This shock momentarily stuns the heart and stops all activity. It gives the heart the chance to resume beating effectively. Audible prompts guide the user through the process. AEDs advise a shock only for ventricular fibrillation or another life-threatening condition called pulseless ventricular tachycardia.

How does an AED Work?

Non-medical personnel such as police, fire service personnel, flight attendants, security guards and other lay rescuers who have been trained in CPR can use AEDs. Although formal training in the use of an AED is not required, it is recommended to help the rescuer increase their comfort and level of confidence. However, AEDs are intended for use by the public. Most AEDs use audible voice prompts to guide the user through the process. Everyone should learn to conduct CPR and first aid training including AED usage.

Who Can Use an AED?

AEDs are safe to use by anyone. Some studies have shown that 90 percent of the time AEDs are able to detect a rhythm that should be defibrillated. This data suggests that AEDs are highly effective in detecting when (or when not) to deliver a shock.

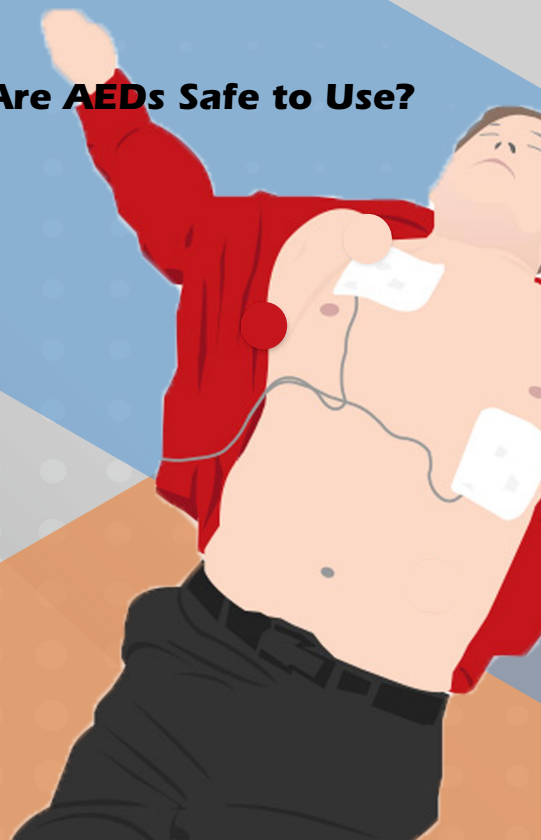

Are AEDs Safe to Use?

57.1%

Victims who received AED shock from bystander had near normal function and better outcomes.

**uLtime
Fusion**

HEALTHCARE SERVICES

Where Should AEDs be Placed?

All first-response vehicles, including ambulances, law enforcement vehicles and many fire engines should have an AED. AEDs also should be placed in public areas such as office, petrol station, sports venues, shopping malls, airports, airplanes, businesses, convention centers, hotels, schools, and medical facilities. They should also be in any other public or private place where large numbers of people gather or where people at high risk for heart attacks live. They should be placed near elevators, cafeterias, main reception areas, and on walls in main corridors.

03 Meet The Team

"GREAT THINGS IN BUSINESS ARE NEVER DONE BY ONE PERSON. THEY'RE DONE BY A TEAM OF PEOPLE"

Many business rely on successful teamwork to reach company goals and objectives. Let us introduce the Ultimate Fusion Sdn Bhd backbone, the anchor & highly dedicated team members.

Mohd Danish Arfan

Managing
Director

Shahrin Sofiyan

Director
Business Strategic
Planning

Khairul Azlan

Director
Business
Development

Mohd Khairul Faizie

Sales
Manager

The youth of today are the leaders of tomorrow

Inspiring from the Nelson Mandela quote, **Danish Arfan** has leveraged his background to propel the company forward. With a company that has been operating for more than 10 years, the company has established itself as a leading supplier of coconut milk and virgin coconut oil in both local and international markets.

Shahrin Sofiyan is a multi faceted track record as a result oriented, innovative entrepreneur and dynamic businessman with extensive experience in the fields of:

- ❖ Retail & wholesale marketing
- ❖ Local & international trading
- ❖ Imports & exports
- ❖ Production of international quality food products
- ❖ Advisor to the coconut industry
- ❖ Participated in international trade fairs & trade missions organized by the EDB & the Department of Commerce

Khairul Azlan has over 20 years of engineering experience in construction project management. He has been pivotal in driving innovation and enhancing project management with quality and efficiency. His leadership has been crucial in overseeing large scale project and fostering a culture of continuous improvement within the construction project management team.
